Delta's Engineering Capabilities

You Can Depend on Delta

Delta has been in business for more than 65 years and our primary market is military and aerospace. The products we make are used in every type of environment and keep people safe, connected and informed. Knowing that our work makes a difference to people performing mission critical roles around the world gives Delta a strong sense of purpose and pride. That translates into exceptional customer service, design ingenuity and manufacturing excellence.

Do you have an interconnect problem that we can solve?

Give our engineering team a call and we will offer you a tailored design to solve your engineering challenge. Yes, Delta manufactures industry standard connectors but much of our work transforms standard configurations into application specific solutions that solve our customers' mechanical, electrical and environmental design challenges. Lengthening contacts, turning discrete interfaces into gang mounts, optimizing connector dimensions, and creating finished RF cables is just the beginning. Delta offers engineering consultations, prototyping of new designs as well as manufacturing of installation and assembly tools like these SMPM bullet extraction tools.

Email bmiceli@deltarf.com or akrauss@deltarf.com or call 978-927-1060 and ask for Andrew or Bryan in engineering.

What's your coaxial engineering challenge?

CUSTOMIZED INTERCONNECTS

Here are just some of Delta's Manufacturing & Engineering Capabilities

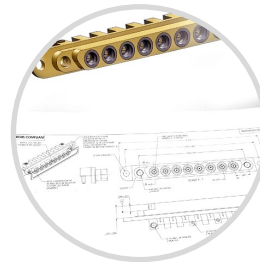

Design Consultation

ANSYS® HFSS Models

Application Consultation

Drawings & 3D Models

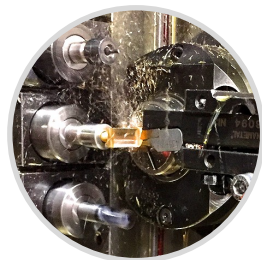

Robotic Automation

3D Printing

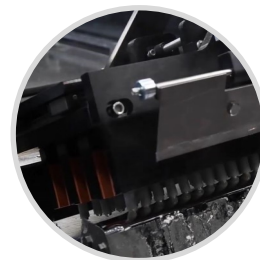

Precision CNC Turning

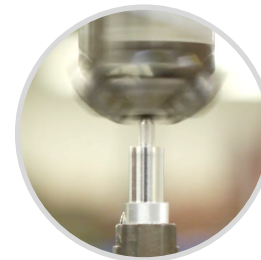

Precision Milling

In House Electroplating

Automated Tin Dipping

Assembly

Cable Assembly
