

PFAS (PTFE) Compliance Statement

September 22, 2025

Part Number: All

Delta Electronics Mfg. Corp. has reviewed their products along with raw materials from their suppliers. Based on this review, Delta Electronics Mfg. Corp. has determined that there is PFAS materials in their products, specifically Teflon (PTFE). Teflon is the primary insulator and dielectric material used in the coaxial cable and connector industry. We are not aware of any proposed regulation to restrict the use of Teflon in electronics.

There are no other PFAS materials contained in our products.

Sincerely,

Mark Reagan
